

The Farm - Mid May 2008

- - The frame addition has been removed and the excavator called in to remove the old foundations. A concrete kneewall is to be poured to help support the rear foundation of the house where the addition is to be built. Some surprises!

Excavator arrives – openings braced with teleposts.

Plucking the cisterns & rubble

Stop everything! - Treasures! Under the concrete porch pad!

I'll keep digging – you sift the area.

Mostly bottles – a figurine.

Lydia E. Pinkhams Vegetable Compound

This tiny blue medicine bottle

Don Heard at the controls.

Ledge for the kneewall.

Stripping topsoil – clay removal

Form and pour concrete footing

Pouring concrete footing.

“J.C.” at the Bayfield River.

“Buffy” the Dingo Dog comes to visit from across the road.

Next day (in the drizzle) the kneewall is formed and poured.

Excavating for the addition.

Dig out for the link and garage.
