

Tree root crumbles foundation

Taking out the old stairs

Remove brick partitions, build beam to support upper floor joists

First we frame the link

Framing the garage

Window openings in the garage are for reclaimed windows from the old frame addition to the rear of the house.

Door and raised windows overlooking the Bayfield River

Tiny scrap pile, fire door between the garage and the link

The big floor joists arrive next week along with garage trusses

June 16 08 Trusses arrive

Unloading joists and trusses

Truck with roll-off trailer pulls out

“J.C.” checks the joists quality

Stairs and partitions in the link

Garage trusses go up tomorrow

Garage trusses going up

Taking out brick partitions (dusty)

Steve said “No rain on the radar”

Downpour – bucket on the saw

When clay bricks were removed from the molds sometimes fingers left marks

Partitions down, beam holding up the second floor joists

Pause in the rain, Trusses are up

Had quite enough of this rainy day

Plywood on the garage roof

Last few sheets of plywood

Stonemasons repairing foundation

Chisel out the old loose mortar

Scratch coat of mortar in stones

Stick frame roof on the link

6/12 meets 8/12 for link roof

Finished stonework on the front

Brad fitting the hip rafters

Friday afternoon, time to go home
