

Living room floor joists (trap door)

Removing soffit, crown & facer

Main floor looking into basement

Original basement area

New upper floor deck from house

Upper pine floors being removed

Rock elm reclaimed/resawn timbers for living room floor area

Upper walls, roof rafters are ready

Up goes the ridge board and the first 2x12 rafters

Creating the gable roof

Rafters up, nailing overhang ladder

Taking shape

Rock elm (1800's) floor beams

The upper floor ready for partitions

Rock elm kitchen beams (1875)

Lilies from our garden in Bayfield

Putting plywood on the roof

Closing in the upper roof

“ Bubba has shingles”

- **Rona makes a delivery. The driver “ Ian “ who’s better known to us as “ Bubba “ dumps the load where we requested.**
 - **Unfortunately their banding machine is broken so it’s been hand done and the result upsets us and “ J.C. “ because most of it winds up spread all over the place.**
 - **“ Bubba “ just throws up his hands, gets the bill signed and leaves. “ J.C. “ inspects.**
 - **Look for the video I’m putting on this site entitled “ Bubba has shingles “ and think of Ian and the banding machine problem - Ken**

“ Bubba “ and “ J.C. “ inspecting.

Backside view of a days work

View from the truck on the ride home – a field of wheat ripening.

**No, it's not Tuscany – fields of wheat
with the Bayfield River cutting through**

Floor boards & joists removed

Creating a giant Hall

Quiet moment in the sun

Laying in the first Rock Elm beam

Sunlight streaming in

More beams put in place

View from the basement

Underside of the old roof

Laying in the rock elm joists

Basement openings

Watching the progress

More beams

Second last beam

There, that's done

Lilies, lots and lots of Lilies

2" of rain overnight, swollen river

Buffy would like a doughnut

From the bedroom window

Duke sheathing upper storey

Sheathing almost finished
